AI CHATBOT - GLAMDOOR ASSISTANT (EN/AR)

OVERVIEW

GlamDoor AI Chatbot handles customer bookings, salon inquiries, and support 24/7 in Arabic & English. Reduces manual WhatsApp replies by 70%, captures leads even at 3 AM, books appointments directly.

CORE FEATURES

1. **Bilingual Support (EN/AR):** Auto-detects user language, switches instantly. All responses, menus, and booking flows in both languages.
2. **Smart Booking Engine:** Customer says "I want a manicure in Marina tomorrow 4pm" - bot checks availability, confirms, sends calendar invite.
3. **Salon Directory Search:** "Show me salons near Downtown for hair" - returns top 3 matches with ratings, prices, and instant book button.
4. **Real-Time Support:** FAQs (pricing, cancellation, reschedule, refunds), live agent handoff for complex cases.
5. **Lead Capture:** Collects name, phone, email, preferred zone & service before booking attempt. Logs to tracking sheet.
6. **Partner Dashboard Sync:** Bookings appear in partner's dashboard instantly. Auto-confirm or manual approve option.
7. **WhatsApp + Web Widget:** Deploys on WhatsApp Business (primary) and as a web widget on the landing page.
8. **Post-Booking Follow-Up:** Auto-sends reminder 2 hrs before, asks for review 2 hrs after. Collects testimonials automatically.

TECH STACK

- **AI Engine:** OpenAI GPT-4o-mini (cost-efficient, fast, multilingual)
- **Platform:** WhatsApp Business API (Twilio) + web widget (React/JS embed)
- **NLU:** GPT-4o-mini with Arabic + English prompts (no separate NLU needed)
- **Booking:** Cal.com API integration for real-time availability
- **Database:** Base44 entities (Bookings, Customers, Partners, Conversations)
- **Hosting:** Backend function (Base44 serverless) - no server maintenance
- **Cost:** ~AED 500/mo (API calls + Twilio) for up to 1,000 conversations

ARABIC SUPPORT SPECIFICS

- RTL text rendering in chat UI
- Arabic salon service terms (manicure = manakir, haircut = qisat shaar, etc.)
- Local dialect awareness (Khaleeji / Gulf Arabic phrases)
- Arabic + English mixed input handling ("I want manakir in Marina")
- Currency always AED, dates in Hijri + Gregorian option

BOOKING FLOW (Customer Side)

- Step 1: Customer sends message (EN or AR) -> bot greets in detected language
- Step 2: Bot asks: What service? Which area? When?
- Step 3: Bot searches partner database, shows 3 options with prices & ratings
- Step 4: Customer selects -> bot checks Cal.com availability -> confirms or offers alternatives
- Step 5: Bot asks for name + phone (if new) -> creates booking -> sends confirmation + calendar invite
- Step 6: 2 hrs before: reminder message. 2 hrs after: review request

BOOKING FLOW (Partner Side)

- New booking notification on WhatsApp + dashboard
- Auto-confirm (default) or manual approve toggle
- Daily summary: tomorrow's bookings at 8 PM
- Block unavailable slots via WhatsApp command: "Block tomorrow 2-4pm"

SUPPORT FLOW

- FAQs auto-handled: pricing, hours, location, cancellation policy, reschedule
- Complex queries -> bot says "Let me connect you with our team" -> notifies admin
- All conversations logged for quality + training
- Sentiment tracking: if user seems frustrated -> auto-escalate to human

DEPLOYMENT TIMELINE

- Day 1: Build chatbot backend function (Base44) + WhatsApp Business setup
- Day 2: Train on GlamDoor FAQ + partner data + Arabic prompts
- Day 3: Beta test with 5 friends (EN + AR) -> fix bugs -> go live

NEW - CHATBOT PROMOTION (Instagram Story)

"Meet your new beauty concierge! Chat with our AI assistant 24/7 - book any salon in Dubai in 30 seconds. Arabic or English, we've got you. Try it now: [WhatsApp Link]"

PITFALLS + QUICK WINS

AVOID:

- Building a full app Week 1 (web + WhatsApp + chatbot is enough)
- Contacting all 100 salons at once (prioritize 50, nail it first)
- Posting generic content (use partner photos - authenticity wins)
- Tracking follower count over bookings
- Giving up after one "no" (follow up 2-3x minimum)
- Slow DM replies (bot handles 24/7, humans handle complex cases)
- NEW: Launching chatbot without testing (always beta test with 5 users first)
- NEW: Forgetting Arabic (50%+ of Dubai market speaks Arabic - bot must support it)

QUICK WINS:

- NEW: Chatbot live by Day 4 = 24/7 lead capture while you sleep
- NEW: Bot auto-collects reviews post-booking = free testimonials on autopilot
- Corporate Partnerships: Email 2-3 co-working spaces "Offer team 15% off beauty" = 10-20 bookings/month
- Partner Videos: Record 5x 30-sec salon videos (phone OK) as Reels = authentic, high engagement
- Review Capture: Collect 3-5 testimonials from first customers, screenshot + post
- WhatsApp List: Build 500+ broadcast list by Day 5 = owned channel (no algorithm)
- GBP Posts: Daily 1-liner update (free) = local search boost

WEEK 2+ SCALE PREVIEW (WITH CHATBOT EVOLUTION)

Week 2: 20 partners | 15+ bookings (5+ bot-driven) | Expand JVC + Al Barsha | Chatbot voice message support

Week 3: Hire 1 part-time partner manager (AED 3K/mo) | 50+ partners | 50+ bookings | Bot handles 80% of inquiries

Week 4: AED 5K/mo ad budget | Referral automation live | Expand Abu Dhabi | Bot upsell flow (add-ons during booking)

Month 2: Bot feature: Arabic dialect expansion (Egyptian, Levantine) | Loyalty program integration | Partner analytics dashboard

Month 2 Revenue Target: AED 15K-25K/mo (10-20% commission + premium listings | 200+ partners | 300+ bookings | Chatbot handles 1,000+ conversations/mo)

WEEK 1 TOOLSTACK
